BioLogiQ Appoints Chin Mou As Distributor for China, Taiwan

November 6, 2018 (IDAHO FALLS, ID)—[BioLogiQ](#), Inc., a bioplastic resin manufacturing company specializing in environmentally friendly plastic products made from renewable resources, announced today that it has appointed Chin Mou Company, Ltd. as a prime distributor for mainland China and Taiwan. Chin Mou will focus on sales and distribution of BioLogiQ's portfolio of NuPlastiQ® BioPolymers.

For reference, BioLogiQ uses a proprietary process to produce NuPlastiQ GP BioPolymers (GP) from natural, renewable resources – plants. GP resins contain 100% USDA Certified Biobased Content, and are ASTM D6400 and EN 13432 certified for compostability. When NuPlastiQ GP is combined with traditional resins, the resulting plastics reduce fossil fuel-based plastic usage and greenhouse gas generation. Many typical packaging resins can become stronger and more durable. Specific products also maintain the recyclability or compostability of other polymers, and can enhance marine biodegradability.

Rod Davies - Vice President, Business Development for BioLogiQ stated that, "Chin Mou has the sales, distribution, and technical knowhow that can assure the success of NuPlastiQ resins in China, Hong Kong, and Taiwan. We are thrilled that they have agreed to represent us in this very important area of the world."

Wilson Yuan, Consultant to Chin Mou, added that, "BioLogiQ's NuPlastiQ BioPolymers add an exciting new dimension to our large portfolio of plastic products. We are looking forward to helping our customers use these products to achieve greater functional, economic, and environmental performance."

About BioLogiQ

Founded in 2011, BioLogiQ, Inc. of Idaho Falls, makes polymers from plants. It was established to create a useful plastic from the excess starch produced (and usually discarded) during potato processing. The company's goal is to help build a world free of pollution caused by fossil fuel-based plastics. For more information, visit www.biologiq.com or www.nuplastiq.com.

About Chin Mou

Founded in 1975, the Chin Mou Company, Ltd. of Taiwan has accumulated over 30 years of expertise in the distribution and engineering of general purpose and engineering thermoplastics. The company serves over 5,000 customers in the packaging, automotive, toy, medical, sports equipment, home appliance, and footwear industries. Please visit www.chinmou.com.tw.
